

Automatic tension joints / splices

Can be used for ACSR, AAC, AAAC, AFL conductors and AMKA messenger

Description:

Suitable for uncovered and covered conductors, which have to be peeled. The automatic joints are reliable and the installation is fast to make without tools. The colour codes make it easy to identify the right type. The wedges ensure a safe joint.

Material:

Body High strength aluminum alloy
Jaws Aluminum alloy

Standard:

EN 61284

Product type	Conductor diameter mm	Color	Weight netto kg.	Package pcs
